	10 A* to C including Mathemathics, English and Science	

experience

Since 2014 **ServiceNow, London** Application Developer

Application Developer - Product

During my time at ServiceNow I have extended my knowledge of the platform as a whole. The gained experience has allowed my to find effective solutions to fulfill business needs.

Detailed achievements:
- Redesigned how end users contribute Knowledge by allowing inline editting to help visualise content before it is delivered.
- Maintain the Service Catalog application by helping customers with issues such as:
  - Performance degradation
  - Custom scripting to fulfill business needs
  - Design

2012-2013 **ServiceNow, London** Application Developer

Application Developer - Internal Systems

Gained invaluable technical and interpersonal skills during internship. Learnt to develop custom scripted business applications on the ServiceNow to extend the platforms capabilities.

Detailed achievements:
- Responsible for improving the internal Knowledge Base:
  - Enable audience based security on articles
  - Improve the look and feel of the UI
  - Collate knowledge from external data sources into ServiceNow
  - Allow easy access to Known Error articles for ServiceNow customers
- Improved Software Development Lifecycle (SDLC) application
- Develop an end-to-end testing framework using Selenium
